BURNETT'S "LIBERTY" TOMATO

For Main Crop and Exhibition Purposes "Liberty" has No Equal

Liberty Tomato, introduced by us three years ago, still holds undisputed reputation as the best main crop and exhibition variety. Liberty was largely grown last season by many competent private gardeners and was exhibited at all the principal exhibitions where it was awarded first prize in nearly every instance. We claim for Liberty the distinction of being the finest Tomato on the market to-day. Liberty is an exceedingly heavy cropper and bears abundantly until very late in the season. The fruit is of a glossy red color, large, perfectly round, uniform in shape, very solid, and meaty, of superb quality with few seeds and borne in clusters of from ten to twelve perfect fruit. All exhibitors and growers should not fail to give Liberty a trial. Pkt. 20c., ¼ oz. 75c., oz. $2.00.

Strong Pot-grown Plants of Liberty ready May 1st. Doz. 75c., 100 $5.00

Castle Rock, Garrison, N. Y.

MESSRS. BURNETT BROS., 72 Cortlandt St., N. Y.

Dear Sirs:—I have been growing your Liberty Tomato for the past two seasons, and have found it to be the most prolific, best flavored variety I have ever tested. It is a strong, clean, healthy grower; the fruit is large and symmetrical, with very few seeds, solid and meaty. It does not crack and was entirely free from black spot. For exhibition I consider Liberty the best tomato now offered.

Yours truly,

JAMES BELL (Supt.)

Burnett's New Cabbage, "Bass Rock"

Burnett's New Cabbage "Bass Rock"

As a second early variety this Cabbage has no equal. It matures a few days later than Early Summer, is much larger and a sure header. For quality and evenness in size it is, without doubt, the finest of the flat headed type grown either for Summer or Winter use, being absolutely perfect in every respect. Pkt. 10c., oz. 40c., ¼ lb. $1.25, lb. $4.00.

A PROMISING NEW CABBAGE.

The Folly, 174th St., Fort Washington, New York City, Aug. 11, 1909.
The Editor Gardener's Chronicle.

Dear Sir: As promised I herewith enclose you a photograph of the new cabbage, "Bass Rock," introduced by Burnett Brothers this season. This cabbage weighed 18 pounds and is a perfect specimen of the flat-headed type.

Had I known how good the Bass Rock was I would never have grown any other variety either for Summer or Winter use. During my twenty-nine years' experience as head gardener to Mrs. J. Hood Wright I have never grown any variety to equal the Bass Rock both for quality and evenness in size, notwithstanding the extremely dry season and unfavorable weather conditions.

Next year I intend to grow nothing else for both Summer and Winter use.

Yours very truly,
CHAS. WEBBER.

The flesh is from 2 to 2½ inches thick. Color greenish white and flavor delicious. This is a perfect Melon, and a general favorite with growers. Pkt. 50c.

The flesh is very deep, ripening clear to the rind, of a beautiful salmon color; exquisite texture, rich and delicious. It is very early, prolific and long bearing; fruit small, smooth skin, color deep emerald green with light stripes. This Melon has a host of admirers and the seed we offer is of a superior strain. Pkt. 10c., oz. 25c., ¼ lb. 75c., lb. $2.50.

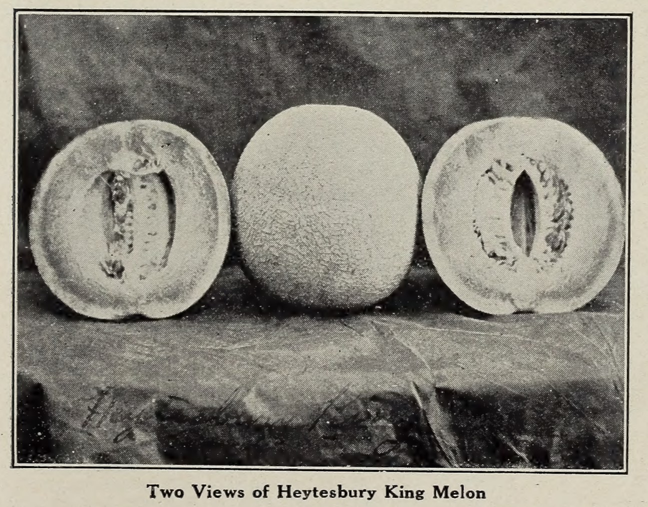
NEW MUSKMELON

J3

Heytesbury King

This Melon, introduced by us, is a seedling of English origin, for which we claim superiority over all other varieties. It is unsurpassed, both as a forcer and for growing in coldframes during the Summer. It is a very free setter, the fruit averaging in weight from eight to ten pounds each, with beautiful golden yellow finely netted skin, and exceptionally thick, firm green flesh, the flavor and quality of which has never been equaled.

Heytesbury King we claim to be the finest Muskmelon ever introduced. Although it has never had a fair test outdoors, we believe that it is well worthy of a trial, and should it prove as successful for outside purposes as it has done under glass, we are certain that it will outclass such well-known varieties as Emerald Gem, etc., and become one of the leading Melons of the day. Pkt. 50c., ¼ oz. $2.00.



Two Views of Heytesbury King Melon

Extract from the Gardeners' Chronicle of America, October, 1910

We herewith present you with two reproductions of photographs of the wonderful new melon raised by Alex Geddes at Rock Acre, Stamford, Conn., the country estate of Albert Crane, Esq., for whom Mr. Geddes is head gardener. We mentioned this melon last month and Mr. Geddes has been true to his word and sent us photographs. These photographs speak for themselves as far as substance and the cropping qualities are concerned. The flavor can be vouched for by many people who have had the pleasure of tasting, among which is the writer. It is certainly the best hothouse melon he ever tasted. Mr. Geddes informs us that the entire crop averaged about eight to ten pounds to the melon. It has been named Heytesbury King and is certainly a king among muskmelons. The year 1910 has been a great one for the private gardener in producing new fruits and flowers and we consider this new melon one of the best productions of the year. It will no doubt be placed upon the market by some of our seedsmen in 1911.

To insure a heavy crop the ground should be deeply dug and well manured before planting. If the potato-beetle makes its appearance, the vines should be sprayed with Paris green, using one tablespoonful to a pail of water and apply with a small brush. Take care to stir the mixture often. Two or three applications during the season will keep the vines clean. Three to four barrels to the acre.

Ellencourt, Elberon, N. J.

Burnett Bros.:

Gentlemen: The Lawn Grass Seed I procured from you this Spring gave excellent results. This is especially gratifying as the season was very much against a newly seeded lawn. The soil here being light and sandy makes it very difficult for grass seed to germinate. Therefore, it gives me pleasure to report the high standard of your seed. Yours truly,

AUGUST GREIB,
(Supt.) Samuel Sachs, Esq.

Burnett Bros.

Dear Sirs: Last February my employer's wife, Mrs. Parr, told me they would like to have some Mushrooms. Although it was very late I made a bed underneath the middle bench in the Carnation house and purchased 8 lbs. of English and 4 lbs. of Pure Culture Spawn from you. Spawning the bed on March the 3d, exactly 6 weeks after spawning I picked the first dish of Mushrooms and continued picking for the following 8 weeks. My employers being delighted with them, owing to this success, I consider it a pleasure to write this letter and I can confidently say that anyone requiring spawn that will give entire satisfaction will make no mistake if they buy from you. I am,

Yours very truly,
Hamilton Scott, *Gardener.*

Burnett Bros.

Dear Sirs: Just a few lines to congratulate you on the quality of Burnett's Special Lawn Grass.

We made considerable alterations last Spring, which made it necessary to make a new lawn. This we seeded with your celebrated mixture, the result of which can be seen here. It is certainly splendid. I never saw so good a lawn from Spring sowing. It is absolutely free from all weeds; the grasses are all of the finest, making a compact, carpet-like turf, of a beautiful dark green color. It is undoubtedly the finest, cleanest and best Lawn Grass Mixture I have ever seen, and can highly recommend it to everyone wishing a superb lawn.

Your truly, Lars Reitan,
Gardener to Henry Block, Esq.

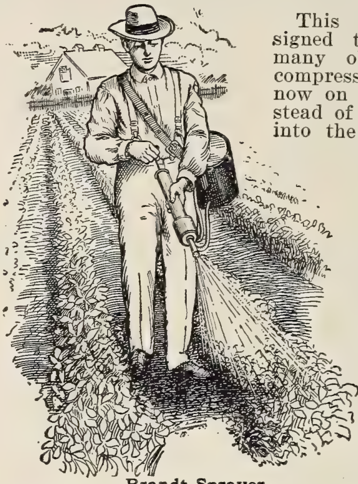
THE BRANDT SPRAYER

A NEW DISCOVERY

The most important detail of the NEW BRANDT SPRAYER is the device for pumping the air into the tank while walking, a feature just discovered and is found in no other sprayer.



Brandt Sprayer

This sprayer is designed to overcome the many objections to the compressed air sprayers now on the market. Instead of pumping the air into the reservoir before starting to spray this sprayer is fitted with a pump which can be worked while you walk, thus controlling the pressure at will. Can be used for one or two rows, and will spray from 15 to 25 hills of Potatoes with each stroke of the pump. Reservoir holds three gallons of liquid, enough to spray a row a mile long, with only one filling. The nozzles are made on a new principle and work with a combination of liquid and air which produces more force with 7 lbs. of pressure than others do with 100 lbs., giving a fine mist-like spray which is sent out with such force that clogging is impossible.

"STANDARD" FLOWER POTS

The Advantages of Standard Pots:

FIRST—Uniform sizes throughout the country.

SECOND—Breakage is not one-half as great as in other pots, the deep rim protecting them from any ordinary hard usage.

THIRD—The foot keeps the pot up from the bench, so that it is impossible for the hole to become clogged.

All Standard Pots from 7-inch and above are provided with the patent Excelsior bottom which insures perfect drainage.
